

## **Interferometry, Holography and Applied Optics**

### [Short pulse switching in optical ring resonators](#)

J.L.S. Lima , K.D.A. Saboia, J.C. Sales, E.F. de Almeida and A.S.B. Sombra

### [Talbot Kaleidoscope](#)

L.F. Avila, J. W. Menezes and L. Cescato

### [Sectioned photorefractive interference patterns produced by dynamic sinusoidal phase gratings superposition](#)

G.N. de Oliveira L.C.da Silva Nunes and P.A.M. dos Santos

### [Baffle design and analysis of stray-light in multispectral camera of a Brazilian satellite](#)

L. C. N. Scaduto, E. G. Carvalho, L. F. Santos, F. M. M. Yasuoka, M. A. Stefani and J. C. Castro

### [Noise-free interference patterns of light with pre-determined movement](#)

A. A. Freschi, A. C. C. Telles and J. Frejlich

### [High absorption measurements in liquids and solids](#)

R. A. Cruz, C. Jacinto and T. Catunda.

### [Intercomparison on optical parallels: initial analyses](#)

A. J. Damião, M. A. F. Destro, F. D. Origo and M. W. Ribeiro

### [Tridimensional laser engraving of industrial injection moulds for Fresnel surface generation](#)

A. Bereczki, G. A. Cirino and S. P. Morato

### [Fresnel lens array with spatial filtering for passive infrared motion sensor applications](#)

G. A. Cirino, R. Barcellos, L. G. Neto, R. D. Mansano, A. Bereczki and Spero P. Morato

### [Engineered Point Spread Function of Fresnel lenses for passive infrared motion sensors](#)

G. A. Cirino, R. Barcellos and L. G. Neto

### [Geometric representation for nondiffracting beams possessing orbital angular momentum](#)

W. C. Soares, D. P. Caetano, and J. M. Hickmann

### [Photographing by means of a diffractive axicon](#)

J. J. Lunazzi and D. S. F. Magalhães

### [Minimizing spherical aberration with conicoidal refractive surfaces](#)

C. R. Zacharias and W. G. Pereira

### [Multi-wavelength electronic speckle imaging](#)

E. A. Barbosa

### [Multi-wavelength holographic refractometry with photorefractive crystals](#)

E. A. Barbosa, G. Severoa, and J. F. Carvalho

### [Missing gaps in photonic crystals](#)

D. R. Solli and J. M. Hickmann

### [Electrically variable optical attenuator using all-fiber Sagnac loop interferometer](#)

M. Fokine, H. Carvalho, P. M. P. Gouvêa, D. M. González and I. C. S. Carvalho

Implementation of spectral optical coherence tomography for applications in odontology

B. B. C. Kyotoku, M. T. Carvalho and A. S. L. Gomes

Measuring mechanical vibrations using speckle photo-electromotive-force produced in photorefractive crystals

T. O. dos Santos, P. V. dos Santos and J. Frejlich

3D shadowgram projection using a simple diffractive screen

J. J. Lunazzi and N. I. R. Rodríguez
